LEVELLA

What is it?

The Levela nail cream is the only cream to be used at the base of the nail plate and to smooth down the flared cuticle edge. Although not a hydrating cream, it does help to flatten the base of the nail to allow the nail plate to grow in a straight line.

The cream contains an ingredient called urea that helps to break down the keratin in the cuticle and nail plate. The cream is applied to the base of the nail plate and the cuticle. It is used to help to flatten the base of the nail plate and to smooth down the flared cuticle edge. It is used to help to flatten the base of the nail plate and to smooth down the flared cuticle edge.

What to do with it...

Apply to the base of the nail plate and the cuticle edge. Use a small amount of cream to the base of the nail plate and the cuticle edge. Use a small amount of cream to the base of the nail plate and the cuticle edge.
