Mavex Active Carbon Foot Cream uses bioactive carbon technology to treat foot odour. Inhibiting bacterial enzymes responsible for foot perspiration, the cream also eliminates bacteria and fungus growth by removing toxins. Active ingredients include bioactivated carbon, distilled rosemary oleoresin, thyme essential oil and natural menthol crystals. Contact BusyMint 0404 455 309

6

Mavex Silky Foot Peeling is the exfoliating second stage in the six-step Alpine Foot Spa experience. This peel polishes and nourishes dried skin as the Alps salt crystals smooth and polish away hardened skin. Gently also helps to prevent excessive perspiration and odours. Anti Dark Spots Hand treatment with Stem Cells of Edelweiss

ANTI DARK SPOTS
FOR HANDS THAT DO NOT SHOW THEIR AGE

Australian Distributors: Busymint Pty Ltd

Facebook: www.facebook.com/busymint

From extensive research by Mavex Switzerland comes a new beauty treatment for hands that combines highly advanced and innovative cosmetic technologies with the most precious, active, natural ingredients from the Swiss Alps.

Advanced Swiss, plant derived stem cell technology, harnesses the essence of the beautiful Alpine Edelweiss flower to create a powerful, yet luxurious hand treatment. The results are real, showing a significant reduction in the appearance of dark spots caused by ageing and sun exposure.

ULTRABRIGHT BIO COMPLEX®

Works by penetrating into the deepest layers of the epidermis, specifically targeting discolouration and uneven skin tone.
